Speaking on the occasion, Akshat Khetan, Founder of AU Corporate and Legal Advisory Services Limited (AUCL), advocates vast changes in the industry, emphasizing the need for a clear pathway to resolve cases and promote an entrepreneurial mindset among young professionals with establishing a framework to manage digital competi-

tion and bringing fuel and energy costs under the ambit of goods and services tax (GST) while abolishing state-level taxes.”

Mr. Akshat Khetan believes in dwelling on the following subjects which are very critical in changing the legal landscape in the country.

The annals of our nation's corporate journey are rich with instances where legal jurisprudence has stood as the bedrock of ethical commercial practice.

Our judiciary, armed with the Constitution, statutory frameworks, and an ever-evolving corpus of case law, has tirelessly navigated the complex waters of corporate governance, competition, labor relations, and consumer protection, fostering an environment where business integrity and social responsibility are not mutually exclusive. It is also critical to acknowledge and address ongoing challenges.

Corporate malpractices, regulatory hurdles, and economic disparities continue to

taint the canvas of our corporate environment. It falls upon the robust partnership between legal jurisprudence and administrative governance to usher in an era of sustainable and inclusive growth.

As we move forward, the path beckons the legal fraternity, corporate leaders, and government bodies to foster a dialogue of development, ethics, and transparency. It is through this triad of trust, accountability, and innovation that Corporate India will not just thrive but also serve as a beacon of balanced progress in the global economic arena. A country's economic success is not only about resource availability but equally about the presence of a robust legal system that safeguards trust, investment, and fairness for all. Just as the skeletal system keeps the human body functional and stable, the legal system serves as the backbone keeping a nation's economic body upright and moving forward.
